

CORPORATE SOCIAL RESPONSIBILITY

Excelcius Limited is a corporate enterprise in Fabrics, Yarns and fibers, Timber Products, welding consumables, metals and minerals, FMCG goods, hardware and software, Engine Parts, Agricultural Equipment and Electronics. Along with our business activities we share the same commitment and determination towards our social responsibilities.

The CSR initiatives adopted by Excelcius Limited are not limited to customer satisfaction, but are in place for the meeting of different stakeholder expectations, such as our employees and society at large.

As an organisation we are well aware of our responsibility towards the environment, hence, we work with factories that have low carbon emissions and have been audited for their energy usage. Further, to limit the strain on the environment, we ensure that all our packaging is from recycled materials.

We also understand our responsibility towards our employees and their well being, hence, all of our staff undergo health and safety training. Further, safety measures are in place inside the factories and in all our office spaces.

To ensure that Excelcius Limited adheres to our commitments towards society, our measures for health and safety go beyond the set industry standards.
